About 4,65,00,00,000 results (0.34 seconds)

Internet speed test

Check your internet speed in under 30 seconds. The speed test usually transfers less than 1 MB of data, but may transfer more data on fast connections.

To run the test, you'll be connected to Measurement Lab (M-Lab) and your IP address is shared with them and processed by them in accordance with their privacy policy. M-Lab publishes the test and publicly publishes all test results to promote Internet research. Published info includes your IP address and test results, but doesn't include any other information about an internet user.
